#### **Get Ready to Play Faster Chess !!**

FIDE President Kirsan Ilyumzhinov recently announced that he had conferred with the current World Champion, Vladimir Kramnik, and they had agreed that the new time control standard for most FIDE tournaments should become Game/ 60 min.. The exceptions will be the World Championship, some major tournaments, etc., where the classical time control will be used.

We think this is too fast and will negatively affect the quality of chess. We do recognize that organizers may see it as a benefit, since they will be able to hold weekend tournaments on 2 days, and it will cut the expenses of space rental. London, Ontario has already experimented with this time control, and the recent York Region March Open used it ( report below ). We will have to wait to hear what chess players thought of it. What do you think? Write us with your views on this suggested new time control !

#### **CFC Takes an Interest in CFC Affairs**

**Maurice Smith** wears many hats. He is currently Vice-President of SCC. He is also a Life Governor of the CFC, having been a past CFC President. He recently became concerned about the state of the CFC – falling membership, falling tournaments, falling revenue, imperiled charitable status, falling retail store sales, etc. So he made a number of suggestions to the CFC in the recent Governors’ Letter # 4. Here are his comments so that you can consider them:

“ I have been a CFC member since 1976 and a CFC Governor since the early 90s. In all that time I have never seen our organization in such a bad financial situation as it is today. I wonder if the Executive and other Governors realize just how serious it is. The cash flow is minimal. The bank account is so low that any new initiative is limited due to the lack of funds. Yet there seems to be a lack of urgency in the Executive towards the situation and what action to take. Maybe they see it as a bad dream that will just fade away. Instead it is becoming their worst nightmare.

There are three main sources of revenue for the CFC. They are membership dues, rating fees and sales of chess supplies. However, the key is undoubtedly memberships. When our membership declines so do our sales and rating fees. So the top priority has to be recruiting new members and keeping the ones we have. Why are we losing so many members? The answer is simple. There are no incentives for the class players and they just turn to the internet. Juniors stay for a while hoping to become masters one day. When they realize that either due to a lack of talent or time or commitment they are most likely not going to reach that level, they turn to the internet. Not much point to keep playing in weekend tournaments just to subsidize the masters. The high rated players tend to stay around longer hoping for titles and awards. So what is the answer? The CFC and organizers must provide incentives to keep class players in the Federation. The following is my list of actions to be taken to help revitalize the CFC. Some are short term, some are long term and some probably cannot be done right away due to lack of funds.

- a} Contact the 400 or so members we lost during the last year. Find out why we lost them and what it would take to bring them back.
- b} We now have certificates for masters once they reach that level. Well how about certificates for each of the classes as they reach the next level. When a player hits the rating level of the next class, send him a certificate as a recognition of the achievement. Also, send him an unsigned certificate of the next highest level, so he knows what the goal is. Make each certificate more attractive than the previous one.
- c} Provincial organizations should hold class tournaments four times a year, once in each season. Local organizers can do the same thing. Contact schools in the area and advertise the tournament there. Advise students that they can become CFC members and play in the "D" section to begin with. The problem here would be to inject some life into several of the Provincial organizations. Ontario seems to be trying and there are one or two others. However, if you check the website, most of them seem to do little.
- d} Organizers holding weekend tournaments that are played in sections should keep the prize fund not too heavily weighted in favour of the top section. If they keep asking the class players to subsidize the masters, then they should also organize tournaments that are fairer to everyone. Otherwise, the organizers are just driving players to the internet. The facts speak for themselves.
- e} The CYCC is not working the way it was intended. A little history is needed here. When I became Vice President I pushed hard for the CFC to become more involved in

Junior chess. I felt that as the only National chess organization in Canada that was recognized around the world, we looked bad in having only a token interest in Junior chess. In my first year as President the CYCC was formed. It was created by Joshua Keshet the Junior Coordinator along with Troy Vail the Executive Director with input from the Executive. There were many disagreements within the factions, but a workable model was finally formed. Basically it was that there would be Regional tournaments for the youth groups.

Then there would be qualifiers from those tournaments to the next level which was the Provincial Championships.

Then qualifiers from there would go on to the National finals now known as the CYCC. The promise was that young players all over the Country could get involved and gradually become CFC members. Also with varying entry fees for each level tournament, this would help the CFC to provide more services for Juniors including looking after travel expenses and even eventually lowering entry fees.

The first couple of years it worked to some degree and it looked like with some tweaking and refining it was a good model to build on. However, Joshua and Troy left their respective positions and the Executive changed. The original concept was left to die, so that now with the odd exception, we are just left with the one tournament in July.

This is a long way round of saying that we should try and revive the CYCC and make it what it was supposed to be. One way to do this is get the schools involved. We have a network of schools that we sell chess supplies to. Any school can hold a Regional CYCC tournament. Or schools can get together and hold a Regional tournament. But this has to be marketed and advertised by the CFC to the schools. Also this has to be done aggressively. We also need to get organizers onside. I don't want to hear any talk that this interferes with Chess N'Math. In Toronto, Chris Field has for several years run both CYCC and Chess N'Math tournaments quite successfully. If a CFC Governor who is also an organizer and is committed to the CFC, he should have no problem in running a CYCC qualifier.

So the CYCC should be revitalized and in turn it will revitalize the CFC. For this to happen we need the people best qualified for the positions involved.

f} Both David Cohen and Nava Starr have suggested we hire a fundraiser to be paid by commission. I fully support this idea. The difficulty is finding the person who has the skills that would want to do this for the CFC. How hard has the Executive been looking for this kind of person I wonder.

g} The auditor has suggested selling off slow moving inventory. Well now that Christmas is over, let's get down to business and start doing this.

To summarize, I think that all of the above will help, although in some cases not right away. Also, to clarify things, I have no objections in having tournaments for masters. Actually I think we should have more of them. However, they should not have to be almost fully subsidized by other players. So now we will see what ideas the Executive have and what action they will actually take. After a year and a half of doing virtually nothing that has had any impact, almost anything would be welcome. “

SCC is fortunate to have another member who is a Life Governor, **Phil Haley**, also a past president of the CFC. In the same Governors' Letter, Phil made the following comments:

“ I believe that the decision to reduce the frequency of publication of Chess Canada to four times a year from six times a year should have first been discussed in the governors' letters with the advantages and disadvantages itemized and then voted upon by the governors. Electronic versions are not an acceptable substitute for the magazine. Other organizations recognize this...a view of the numerous magazines on sale at Chapters clearly confirms the fact that printed versions are not only not on the way out but are gaining in acceptance. One needs only look at the thriving number of magazines in areas such as poker, philately, travel, business etc. Although fewer issues per year will reduce costs, on the other hand the reduction in number of issues may have a negative impact on tournament participation and membership numbers.

Could I suggest that any time we publish financial data it should be accompanied by columns comparing the new data with both the budget and previous year's data. The financial information in the last governors' letter suffered from the lack of comparative data.

We keep hearing comments about the status of receipts for charitable donations but there has been a lack of information as to exactly what receipts have been challenged and on what basis. Has there been a change in practice in recent years? Procedures used to be quite rigid and closely followed.

The CFC catalog in the last Chess Canada leaves a lot to be desired as it is almost entirely a detailed list of what is available but with no suggestions as to what is new and good and no reviews of new books etc. It seems to make little effort to promote sales.

It would have been desirable to have a full page advertisement for the 2007 Canadian Open in the last issue of Chess Canada which arrived in mid-December...many players have to plan their vacations well in advance so that early publication of Canadian Open advertisements helps boost attendance...hopefully the advertisement will provide details relative to nearby hotel accommodations etc...not every player will want to stay in a university residence...and detailed information about playing schedule, prizes, tournament hall etc. We should probably be able to achieve greater participation from US players than we do as well as greater Canadian participation. I personally do not agree with spending money for participation of relatively obscure European players and doubt if this leads to an increase in number of entrants...it is preferable to have the participation of leading Canadian players including the Canadian champion and Olympic team members and exciting players such as Lawrence Day and Duncan Suttles.

The covers of Chess Canada should be in a distinctive bright colour with a different colour each month in order to help promote bookstore sales...perhaps a picture of an event or of a leading Canadian player on the cover would attract more attention than the present cat and chessboard.

Finally, I would like to support the proposal of Berik Balgabaev re the World Championship. FIDE has lost a lot of status as a result of its frequent changes in world championship format...it seems to me that Mr. Balgabaev's proposal has many positive features and hopefully will be accepted and left unchanged for many years. "

### **SCC Club Championship**

This 10-player Championship Section round robin started Jan. 4. Before the tournament had been completed, Master Bryan Lamb, highest rated player, had clinched the Championship. But he had one remaining game against the second highest rated player, expert Imtiaz Husain, who still had a chance for second place. Imtiaz handed Bryan his only defeat of the tournament, winning him second place, only ½ pt. behind Bryan. In third place was expert John Hall with 6.5 pts.. But one player could still tie him

– Alex Rapoport, one of last year's three co-champions, had only 4.5 pts., but 2 games outstanding.

Here is the Husain – Lamb game ( Annotations by Bob Armstrong, using Fritz ):

### **GTCL League**

The Greater Toronto Chess League has 2 team leagues, one 2000& Over, and one Under 2000. There are 3 teams in the Premier League : Chess Academy of Canada, Willowdale CC and Brampton CC. This year SCC has both an " A " and " B " team in the U 2000 league. There are 8 teams in this division. The others are Chess Academy ( 2 ); BOTS ( Conrad Ho ); Willowdale CC; Brampton CC and Knights of Chess.

On Tuesday, March 20, SCC " A " played Willowdale and tied 2:2. Here are the results:

## SCC Spring Swiss

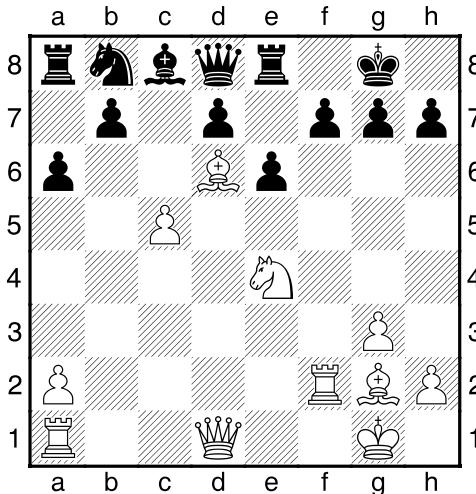

40 players registered for this one-section, 8 round swiss which started on March 15. Rd. 4 is on Thursday, April 5 – if you would still like to play, come out and you will be given  $\frac{1}{2}$  pt. byes for the three missed rounds – you'll be able to jump right in.

Rd 1 of a swiss sees the greatest discrepancy between the ratings of the opponents. There were many hard – fought games. In one game, newcomer Danny Aniag sacked pieces against junior Nathan Farrant-Diaz on his way to a win with a K-side attack. Here is their game ( Annotations by Bob Armstrong, using Fritz ):
