Unification World Chess Championship Underway

This 12-game match is being played Sept. 23 – Oct. 12 in Elista, Kalmykia, Russia. Vladimir Kramnik (Russia) is the 2000 Classical World Champion. Veselin Topalov (Bulgaria) is the 2005 FIDE World Champion. The prize money is \$1 million (USA), split equally between the players, regardless of result. The winner goes on to the 2007 World Chess Championship tournament. After 4 rounds, Kramnik has taken a surprising early lead 3 -1. The games have been exciting.

In Round 1, Topalov went down a P. But he had K-side pressure. He thought he still had chances for a win, and so twice he refused to repeat positions for a draw when had the chance. We have seen this enterprising type of play before in Topalov, where he puts everything into going for a win. By move 57, though, the best he had was a draw, by a tactical knight sacrifice. But he missed it and played a losing move. So Kramnik won the first game of the match.

In Round 2, Topalov had an extraordinary K-side attack, where he twice offered his Queen, in exchange for a mate. Kramnik still had equality, but then blundered. But unbelievably, Topalov missed the winning move. Then on move 53, with Kramnik being up the exchange, Vladimir missed his winning move. But on move 55, Topalov missed his drawing move, and eventually lost. So Kramnik took a devastating 2:0 lead in the match. Here is their second game (Annotations from various sources):

Carlsen Norwegian Chess Champion

Magnus Carlsen, only 15 years old, tied 7 time Norwegian Champion, and former coach, Simen Agdestein in the 2006 Norwegian Championship, forcing a playoff. The 2 regular games were drawn, and then Carlsen won the two rapid games to win the Championship. Carlsen is supposed to play in the World Championship Candidates Matches in October against Armenian Levon Aronian (currently # 3 in the world).

World Chess Championship Candidates' Matches in Trouble

A play down of 16 players to a final 4 (the Candidates' Matches) was to have been played this month. The final 4 would then play in the 2007 World Chess Championship round-robin, with the 4 players already seeded into the tournament. The round 1 of the matches was to have been :

1. Levon Aronian (Armenia - 2761) vs Magnus Carlsen (Norway - 2673)
2. Peter Leko (Hungary - 2738) vs Mikhail Gurevich (Turkey - 2643)
3. Ruslan Ponomariov (Ukraine - 2721) vs Sergei Rublevsky (Russia - 2667)
4. Boris Gelfand (Israel - 2729) vs Rustam Kasimdzhanov (Uzbekistan - 2672)
5. Etienne Bacrot (France - 2707) vs Gata Kamsky (USA - 2697)
6. Alexander Grischuk (Russia - 2709) vs Vladimir Malakhov (Russia - 2691)

7. Judit Polgar (Hungary - 2710)
8. Alexei Shirov (Spain - 2716)

vs Evgeny Bareev (Russia - 2683)
vs Michael Adams (England - 2732)

But FIDE has admitted having trouble financially organizing the matches, which were announced back in January. FIDE President, Kirsan Ilyumzhinov, has suggested the matches will have to be postponed until April, 2007, and he has offered to hold them in Elista, Kalmykia (site of the current World Championship match). He has also suggested that the format of the Candidates' Matches be changed to a 16 player round-robin, from which the top 4 players will go into the 2007 World Championship tournament. Already there has been opposition voiced to these changes by some of the Candidates. But financial realities may end up determining the eventual format for 2007.

SCC Howard Ridout Memorial Fall Swiss

This is the first SCC tournament of the new 2006-7 season, and a record 42 players have registered for it. After 3 rounds, there is a tie for 1st/4th place : Bryan Lamb (highest rated player in the club); John Hall (second highest rated); Donal Deiseach (one of last year's club co-champions); Jim Paterson (another co-champion).

In Round 1 Jim Paterson, barely escaped an upset by Steve Douglas. Here is their game, where Jim got into serious time trouble (Annotations by Bob Armstrong, using Fritz):

Manalo, P (1659) – Lamb, B (2117) [B07]

SCC Fall Swiss Toronto (3), 28.09.2006

1.d4 Nf6 2.Nc3 d6 3.e4 g6 transposing to Pirc Defense 4.Bc4 Bg7 5.Nge2 0-0 6.f3 c6 supposed to be equal here – W's next move is not unusual, giving slight edge to B 7.Bd3 Nbd7 8.Be3 e5 9.Qd2 Re8 10.0-0-0?! exd4 11.Nxd4 Ne5 12.Be2 d5 I realized after Be2 that ...d5 was not necessarily great for me but since W is taking aim at d6 I think I have to play it now 13.Bg5 dxe4 14.fxe4 [14.Nxe4 Nxe4 15.fxe4=]

14...Qa5? 15.Rhf1 Nxe4 computer analysis says this is wrong (giving it a ??); I was fairly sure it was not sound when I played it but I thought the lines were OK for me in his most likely replies. I couldn't resist the opportunity to make the position complicated. **16.Nxe4 Qxa2 17.Nc3??** this was one line I analyzed when playing 15...Nxe4. I thought I would have the advantage here....and the computer thinks this move is a blunder for W (because it overlooks W's best reply which appears to be 17.Qb4, after which Bl. doesn't appear to have much compensation for the sacrificed piece; though I looked this move, I still chose 15....Nxe4 because I considered it unlikely that W would reply with a move such as 17.Qb4. As it turned out, I was right, so even though it was a technically incorrect sacrifice, psychologically it ended up working). **17...Qa1+ 18.Nb1 c5** this is the whole point of the " combination " – planning Nc4 if W moves the attacked N (W can still survive after 19.Nb3 Nc4 20.c3, similarly to the line given below with 19.Bb5 after 18...c5) **19.Qf4??** computer gives 19.Bb5 as correct for W [19.Bb5 Rf8 20.Nb3 Nc4 21.c3 Nxd2 22.Nxa1 Nxf1 23.Rxf1 with a roughly even position] **19...cxd4 20.Bb5 d3** [Bryan had 8 min. left at this point, and Pepin had lots of time : Ed.] this move is based on a miscalculation but is also a " hard to resist " move. Computer analysis gives 20....Bf5 as being the correct move. Actuallyd3 is still " sound " as B still has a slight advantage if W takes the R. I was thinking if W does 21.Bxe8, I have dxc2 22.Bxf7+ Kh8 and after 23.Kxc2 Bf5+ W has lots of problems. However in my analysis, I forgot about the relatively obvious 23.Rd8+ which wins for W on the spot. So if W plays 21.Bxe8 I have to play as set out below. [20...Bf5] **21.c3??** the alternate line below was still the most correct thing to do [21.Bxe8 Bf5 22.Qa4 dxc2 23.Qxa1 cxb1Q+ 24.Qxb1 Rc8+ 25.Kd2 Nc4+ apparently with a slight advantage to B.] **21...Bf5 22.Rd2 Re6 23.Re1 Rc8** I was intendingRae8, touched my R and then realized e8 was still under attack. So I had to do this. Here I have 2 min. remaining for the game. Manalo has about 15 or 20 min. I think. [By now there were about 10 players gathered round to watch, to see if Bryan could beat the clock : Ed] **24.g4 Nf3** W is definitely losing here **25.Rxe6 Nxd2** too hasty in time pressure.....Bxc3 instead is much better **26.Re8+** this allows the tables to turn in B's favour **26...Rxe8 27.Qxd2 Re2** I spent about 20 sec. here on 27...Re1+, eventually convincing myself that it didn't work, but actually it gives B a big advantage [27...Re1+ 28.Qxe1 Qxb1+!! 29.Kd2 (29.Kxb1 d2+) 29...Qxb2+] **28.gxf5** W, who seemed almost on the verge of resigning here, continued on much to my chagrin and lasted over 25 more moves **28...Rxd2 29.Bxd2 Qa5 30.Bxd3 Qd5 31.Kc2 gxf5 32.Na3 Qg2 33.Kd1 Qh1+ 34.Kc2 Qxh2 35.Kd1 f4 36.Nc4 f3 37.Ne3 Bh6 38.Nf1 Qh1 39.Bxh6 Qxh6 40.Kc2 Qf4 41.Kd1 h5 42.Nd2 h4 43.Bf1 Qg3 44.Nc4 Qg1 45.Nd2 Qf2 46.Kc2 Qe3 ...h3 wins really fast here; for some reason I didn't play it. It doesn't affect the outcome but may have taken a bit less time 47.Kd1 f2 48.c4 h3 49.b4 h2 50.Bg2 Qe1+ 51.Kc2 Qe2 52.b5 h1Q 53.Bxh1 f1Q 54.Bxb7 Qfd1+ 55.Kc3 Qexd2#** the ending is not remarkable, only if you are not impressed by 30 moves (starting from move 24) played in under 2 min. to end the game [there was loud applause from the crowd when Bryan made the time control : Ed.] **0-1**
