Chess Strength and Aging

(by Frank Dixon, from ChessTalk Posting Jan. 31/08)

Many GMs believe that a player's peak can occur as late as the mid-30s.

GM J.R. Capablanca became world champion in his 33rd year;
GM Alexander Alekhine became world champion for the first time in his 35th year;
GM Max Euwe became world champion at age 34;
GM Mikhail Botvinnik became world champion for the first time in his 37th year;
GM Vasily Smyslov became world champion at age 36;
GM Tigran Petrosian became world champion in his 34th year;
GM Boris Spassky became world champion at age 32.
GM Bobby Fischer became world champion at age 29.

There were some exceptions to this pattern. GM Mikhail Tal became world champion at age 23. Then we have more recently had a drop in ages for world champions gaining the title. GM Anatoly Karpov became world champion in his 24th year (by default), and may have reached his playing peak in his mid-to-late 30s (chessmetrics ratings). GM Garry Kasparov became world champion for the first time at age 22, and may have reached his playing peak in his early to mid-30s. More recently, GM Vishy Anand won the unified world championship in 2007 in his 38th year.

Then we have had GM Wilhelm Steinitz, who was still able to successfully defend his world title in 1892 in his 56th year against GM Mikhail Chigorin. GM Steinitz

played chess at a top-5 level past age 60. GM Aron Nimzowitsch reached his peak as a player with his win at Carlsbad 1929, over a world-class field (missing only Alekhine among the top echelon) in his 43rd year. We have had GM Emanuel Lasker, who won New York 1924 in his 56th year over a world-class field, including the world champion Capablanca. GM Lasker played superb chess into his late 60s, with outstanding results as late as Moscow 1935, which he won against a very strong field. GM Mikhail Botvinnik was still virtually a top-ten player into his late 50s, competing only occasionally. GM Vasily Smyslov reached the Candidates' final in 1984 at age 63. GM Efim Geller won the USSR Championship in 1979 in his 54th year. GM Lajos Portisch was a top-ten player into his late 40s. GM Samuel Reshevsky won an international tournament at Reykjavik 1984 in his 73rd year, and competed successfully for several years after that. GM David Bronstein won the 1995 Hastings Challengers' Swiss in his 71st year. Nowadays, we have GM Viktor Korchnoi, who was a Candidate in 1988 in his 57th year, and still maintains a 2600+ rating into his mid-70s.

Closer to home here in Canada, GM Abe Yanofsky at age 61 in the 1986 Canadian Zonal scored well enough to qualify for the Interzonal, but generously ceded that opportunity in favour of a younger player. IM Lawrence Day will soon celebrate his 59th birthday (tomorrow I believe!), and he made a respectable result in the 2007 Canadian Open. I note with pleasure that IM Day will compete this weekend in Guelph! Good luck and good skill, Lawrence! Happy birthday, and many happy returns! IM Jean Hebert tied for the Canadian Closed title at Kitchener 2007 in his 50th year, before losing in playoffs.

The oldest player to become a Grandmaster is the Latvian Yanis Klovans, a contemporary of GM ☺Mikhail Tal, who was in his mid-60s when he earned the title. A convincing argument could be made that Klovans reached that level of strength earlier, and likely deserved the title earlier, but was denied because of lack of norm opportunities in the Soviet Union.

If a player can maintain a good level of physical fitness, can remain mentally sharp and competitively tough, and can devote enough time to study and train, it seems highly possible to obtain good chess results into one's golden years, maybe even the best of one's life!

FIDE Sets Up 2008/9 Grand Prix

This concept was unveiled by FIDE some time ago, when they were initially setting up the 2008-2010 World Championship Cycle. The idea is to have a series of 6 world class round robin tournaments (14 players), and players will amass cumulative points for their standings in the various tournaments (there best three results). The Grand Prix winner will be the player with the most points accumulated by the end of 2009. This winner will then play a Candidates' Match with the 2009 FIDE World Cup winner, for the right to play for the World Championship in 2010 (the right to play for the 2009 World Championship will be determined in a match this year between Veselin Topalov (Bulgaria), 2005 FIDE World Champion, and 2006 World Championship Challenger, and American Gata Kamsky, winner of the 2007 FIDE World Cup).

The venues and dates for these 6 tournaments have now been announced (apparently FIDE has tried to schedule so as not to conflict with already established major tournaments like Corus, Morelia/Linares, Sophia, Dortmund, etc.):

April 20th – May 6th 2008, Baku, Azerbaijan

July 30th – August 15th 2008, Krasnoyarsk (or other Russian city), Russia

December 13th – 29th, 2008, Doha, Qatar

April 14th – 28th, 2009, Montreux, Switzerland

August 1st – 17th, 2009, Elista, Russia

December 7th – 23rd, 2009, Karlovy Vary, Czech Republic

Reserve cities are Istanbul and Teheran.

The 14 qualifiers for this series are: Anand, Kramnik, Topalov, Kamsky, Shirow, Carlsen, Karjakin, Ivanchuk, Mamedyarov, Leko, Morozevich, Aronian, Radjabov and Gelfand. The reserves are, in order, Adams, Svidler, Polgar and Grischuk.

Moscow Open

This 9 round swiss tournament was played in Moscow, Russia from February 2 - 10. There were over 30 GM's over 2600 in the Open A Section. There was also a women's tournament. Here are the final results:

New book on Canadian Grandmaster Duncan Suttles – Book Review

(submitted by Erik Malmsten)

Chess on the Edge by Bruce Harper and Yasser Seirawan is just being published by Chess'n Math and I proofread the final draft. The publishing of the Suttles game collection has been a life-long dream of Vancouver master Bruce Harper. For those of us over 50, we can remember Suttles as the Canadian grandmaster who threw a wrench into classical opening theory and took on all comers playing 1.g3 or 1...g6. Canadians en masse adapted the Rat Defence as our own.

Suttles was one of only 100 Grandmasters at the time who played all the top players in two Interzonals. He also played in eight Olympiads and many top round-robin. This game collection isn't just his best wins, as well as his wins over top players like Larsen it includes his losses to Fischer, Tal, and Gligorich. It shows the evolution of his opening ideas and the book would greatly aid those who play, or play against, the Rat.

The organization of Volume 1 is brilliant. Suttles' most interesting 100 games are divided into themes such as Positional Play, Space, Positional Sacrifices, Rook Pawns, King Walks, Weird Maneuvers, Psychology, Just Plain Funny, Blow Outs, Tricks, and Crash and Burn. This makes this volume useful to today's students to learn about specific aspects of the game. Interesting discussions include the idea that non-losing choices are equally good versus striving to find the one best move.

The other two volumes lists 513 more annotated games by opening (Volume 2 ECO A openings). Many of these games were interesting enough to have been in Volume 1. The Suttles System is g2-g3, d2-d3, Nc3, Bg2, Bd2 and Qc1. He also liked playing a3 or Nh3. The line between Black and White is often blurry in Suttles' games.

A collection of quotes from the book:

Suttles once said, "the point of chess is to trick the other guy." Suttles confused his opponents to induce them to make errors. Lawrence Day notes, "A student can learn much about the handing of unclear positions, deferred options, positional tension, speculation and pawn power from his games." Suttles' dexterity with his knights is legendary. He is committed to the element of pawn structure, even at the expense of time, space and material. The more unusual the pawn structure the better, as then both he and his opponent must orient themselves to unfamiliar positions. He is a positional player with a propensity for provoking wild tactical slugfests. His style is based upon a ruthless objectivity, combined with a cold-blooded willingness to play moves most players would be afraid to play. Yasser Seirawan writes that in 1973, "His original style of play thrilled and delighted us all." Duncan's style involves flinging down a gauntlet and proudly exclaiming, "Refute this -- if you can!" Suttles was not afraid to lose games.

It's hard to choose a sample game. There were interesting battles with Browne, Seirawan and Spassky. This game has been simplified from three pages of notes:

SCC'ers Go to Guelph
(Part 1 of a 3-part series)

A strong contingent of SCC members showed up at the Guelph sectional swisses reported on above. The players and their results were:

Open Section – Yuanling Yuan – 2.5
U 2100 – Alex Ferreira 4.5 – 1st place !
Alex is right front

Richard Douglas – 2.5
Josh Sherman – 2
Bob Armstrong – 2
U 1800 – Joe Bellomo – 4.5 – 1st place

Joe Bellomo

Kevin Wu – 3.5

Mario Moran-Venegas – 3

Nathan Farrant – Diaz – 3

Doug Gillis – 2.5

David Farrant – 2.5

Tom Muir – 2 (only played 2 rounds !)

Dinesh Dattani - .5

U 1500 – Marc Ben-Avraham – 2.5

As usual, on bended knee and in a pleasant voice, I begged them to give me for the newsletter their “ most interesting “ game from the tournament. Obviously a big upset would qualify generally. But it could also be a game that was lost, but was well-played and had complicated tactics. Here are some of the games submitted (I'll spread them out into a three-part series in the next few Issues).

I'll start with my nice K-side KID-Samisch attack against former SCC member, Jaimie Solis (with a Q-sac mate to finish it off). Here is the game (Annotations by Bob Armstrong, using Fritz):

2007/8 SCC Club Championship

On Jan. 3 SCC started its 2007/8 Club Championship. It is in 2 sections again this year. 52 players registered.

The top section A is a 10-player 9-round round robin. It is composed of the top 8 rated players who registered, plus the first and second place winner in the 2006/7 Club Championship Reserves. Playing this year are a master, 4 experts and 5 A players (ratings as of start of the tournament): Master Bryan Lamb; junior girl expert Yuanling Yuan, expert John Hall; expert Alex Ferreira; expert Erwin Casareno; A player Rick Garel; A player Randy Moysoski; A player Yibing Fan; A player Bob Armstrong (1st - Reserves); and A player Josh Sherman (2nd - Reserves).

The other 42 members play in a one section, 10 round swiss. The first and second place finishers earn the right to play in the Championship Section for the 2008/9 Club Championship.

After 7 rounds, the following players lead:

Championship Section: 1st Provisional Master Erwin Casareno – 5 ½ pts.

2nd – Master Bryan Lamb – 4 ½ pts (but he has one game outstanding, and so could tie Erwin for first theoretically)

3rd – Expert John Hall – 4 pts. (but he also has one game outstanding, and so theoretically could have 5 pts.)

4th – Expert junior girl Yuanling Yuan – 3 ½ pts. (but she also has 1 game outstanding, and so could theoretically have 4 ½ pts.)

Reserves: 1st – junior Kevin Wu – 6 pts (undefeated)

2nd – junior Aaron Wu – 5.5 pts. (only loss was to Kevin)

3rd /5th – 5 pts. - Oscar Villalobos

Ken Kurkowski

Pepin Manalo

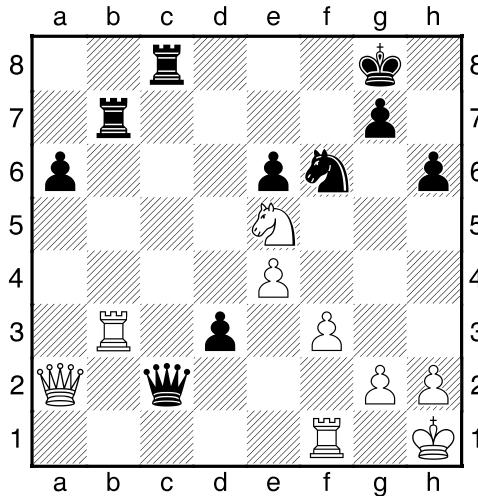

In Rd. 5 in the top section, Erwin Casareno took sole possession of first place with a win over Alex Ferreira – he went up a pawn, and got a winning advantage; in desperation, Alex decided to sac his rook for attacking/drawing possibilities, but they fizzled out. Here is the game (Annotations by Bob Armstrong, using Fritz):

In Rd. 6 in the Championship Section, master Erwin Casareno

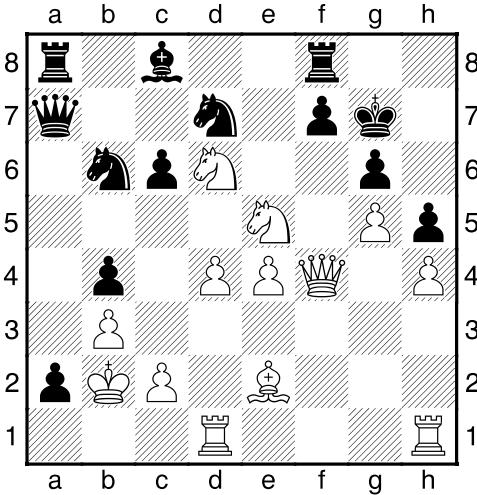

kept hold of first place with a win over your intrepid editor, Bob Armstrong, where he certainly dodged a bullet: I missed getting a second queen; I missed a mate; I force him to sac his Q; I decided against taking a draw by repetition and went for a win (a good decision really); I missed winning a free B; I miss a draw and make a terrible blunder at the end in time pressure that gives him a win. My play is certainly inconsistent – get good positions, and then don't convert them. But Erwin had to play a long time under 5 min., and did well given the time pressure. In Rd. 6 as well, in the top section, John Hall

held onto second place with a win over Randy Moysoski. He took the advantage early, and never gave it up, eventually forcing Randy to sac the exchange. He then also went up a pawn. The game went into time pressure, and John came out on top, given his existing advantage. Here is their game (Annotations by Bob Armstrong, using Fritz):

In the Reserves Section in Rd. 6, the first place player, junior Aaron Wu, faced off against junior Kevin Wu, who was in second. Aaron speculatively, in a losing position, sacked a minor piece for 2 pawns. Near the end, Kevin gave back a knight for an attack, and came up with mate. This left Kevin alone in first place, and dropped Aaron back into a tie for second. Here is their game (Annotations by Bob Armstrong, using Fritz):
